

# ACKNOWLEDGMENTS

Automotive Research and Design Company would like to thank the many companies and organizations that have supported the creation of this product. We are grateful for their cooperation and generosity. For without their assistance in providing permission to use pictures, illustrations, and graphics this product would not have been developed.

American Honda Motor Co., Inc  
Ford Motor Company  
General Motors Corporation  
Lexus (a Division of Toyota Motor Sales)  
Toyota Motor Corporation

## CONTENTS

	<b>Page</b>
<b>Introduction</b>	<b>1</b>
Objectives	1
Key Terms	1
Introduction to Hybrid and Electric Vehicle System Technology	2
Series Design	2
Parallel Design	2
General Categories of HEV Technologies	4
Strong, Mild, and Fuel Cell Hybrid	4
Categories of Hybrid Powertrains and Power Flow	6
Series/Parallel Power Flow	7
Parallel Power Flow	8
Production Strong Hybrid Systems	10
Anatomy of a Hybrid Vehicle: The Ford Escape Hybrid	15
Points to Remember	18
Chapter Quiz	19
<b>Chapter One – High Voltage Electrical Safety</b>	<b>21</b>
Objectives	21
Key Terms	21
High Voltage Electrical Safety	22
Definitions of High, Intermediate, and Low Voltage	22
Symbols	22
General Electrical Safety Precautions	23
Electric, Hybrid, and Fuel Cell Specific	23
Electric Shock	24
Ground Circuits	28
Tool and Equipment Usage and High Voltage Systems	31
Oscilloscopes	32
Differential Scope Probes	32
Class 0 Electrical Isolation Gloves	32
Multimeters	33
Meter Category Levels	33
CAT I	33
CAT II	33
CAT III	34
CAT IV	34
Points to Remember	35
Chapter Quiz	36

	<b>Page</b>
<b>Chapter Two – High Voltage Analysis Tools and Personal Protection</b>	<b>37</b>
Objectives	37
Key Terms	37
High Voltage Analysis Tools and Personal Protection	38
Personal Protection Equipment	38
High Voltage Analysis Tools	40
Points to Remember	44
Chapter Quiz	44
<b>Chapter Three – High Voltage Vehicle Safety Systems</b>	<b>47</b>
Objectives	47
Key Terms	48
Hybrid High Voltage Safety Systems	48
Hybrid High Voltages Safety System Designs	50
Serial Interlock Loop (SIL)	50
Local Interlock Loop (LIP)	50
Service Disconnect Switch Systems	65
Ford Escape Hybrid	67
GM PHT	67
Toyota Prius	68
Honda Civic Hybrid	69
High Voltage Isolation Fault Detection System	71
dc and ac Isolation Detection Circuits	71
Isolation Fault Circuit	76
Voltage Sensing Stage	77
Differential Amplifier Stage	78
Voltage Comparator Stage	79
Logic / Digital Output Stage	81
Isolation Fault Detection Circuit Software	82
Voltage Regulator Circuits	83
Testing for Isolation Faults	85
Points to Remember	85
Chapter Quiz	86
<b>Chapter Four – Hybrid Engines</b>	<b>89</b>
Objectives	89
Key Terms	89
Hybrid Engines	90
The Atkinson Cycle	90
The Miller Cycle	91

<b>Chapter Four Continued</b>	<b>Page</b>
Engine Optimization	92
The Atkinson-Miller Cycle Variant	92
Comparison of the Atkinson and Otto Cycles	93
How can Otto Cycle emulate the Atkinson-Miller Cycle?	94
Hybrid Electric Vehicle and Electric Traction Systems	94
Points to Remember	95
Chapter Quiz	96
<b>Chapter Five – ac Induction Electric Machines</b>	<b>97</b>
Objectives	97
Key Terms	98
Introduction to the Electric Machine	98
Electric Vehicle Propulsion System	99
Series Hybrid Electric Propulsion System	100
Parallel Hybrid Electric Propulsion System	100
Dual Parallel Hybrid Electric Propulsion System	101
Common Electric Vehicle System Components	104
Induction Machine System	106
No Contacting Components	108
IM Component Overview	108
The Magic of Mutual Induction	121
The Magic of Magnetism	126
The Rotor and Stator	128
How Rotor Motion is Generated	128
How does the Rotor get Magnetized	129
Assembling the Entire Story	133
Positive, Zero, and Negative Slip	136
Vehicle Braking and Electric Machines	142
Reversing Rotor Direction	143
Placing a Vehicle in Reverse	143
IM Efficiency and Maximum RPM	143
Vector Motor Control Strategy	144
Points to Remember	148
Chapter Quiz	149
<b>Chapter Six – Permanent Magnet Electric Machines</b>	<b>153</b>
Objectives	153
Key Terms	153
The PM Brushless Direct Current Motor	154
Introduction	154
How does a PM/BLDC Motor Differ from an IM?	160
Rotor and Stator Interaction	165

<b>Chapter Six Continued</b>	<b>Page</b>
Traction Control / Regen / Antilock Brake Operation	166
Summary	167
Points to Remember	167
Chapter Quiz	168
<b>Chapter Seven – Power Inverter Systems</b>	<b>171</b>
Objectives	171
Key Terms	172
Introduction to the Power Inverter	175
Power Inverter Topology and Motor Control	179
IM / PM Power Inverter	180
The Hybrid and Electric Power Systems	181
MOSFETs and IGBTs	181
Motor Power Control Strategies	186
How is a PWM Sine Wave Created?	187
Generating the Electric Machine Waveform	195
How Maximum Motor Speeds are Determined	197
The Six-Step Motor Control	198
Additional Waveforms and Comparisons	201
Why so Many Waveforms?	202
Increasing Electric Machine Voltage	203
Effects of Overmodulation	204
Positive Effects	204
Negative Effects	206
Regenerative Braking	207
PM/BLDC Machine and Regen	211
Power Inverter Voltage Boosting	212
Increasing Electric Motor Power and Torque	212
Operation of the dc-dc Boost Converter System	216
Boost Control Sensing Circuits	217
dc-dc Converter Operation:	218
Step 1 – Charging Reactor	218
Step Two – Discharging Reactor	220
Step Three – Regenerative Braking	221
Points to Remember	222
Chapter Quiz	223
<b>Chapter Eight – Electric Propulsion Sensing Systems</b>	<b>227</b>
Objectives	227
Key Terms	227

<b>Chapter Eight Continued</b>	<b>Page</b>
Sensors	228
Motor Speed Sensing – Encoders and Resolvers	228
Encoders	228
Resolver	230
Resolver Operation	234
Other Sensing Systems	239
Motor Load / Electrical Current Sensing	241
Throttle / Pedal Position Sensing	244
Special Propulsion System Operating Modes	247
Points to Remember	248
Chapter Quiz	248
<b>Chapter Nine – dc-dc Converter Systems</b>	<b>251</b>
Objectives	251
Key Terms	251
Introduction to the dc-dc Converter	252
The Fundamentals of dc-dc Converter Operation	256
Circuit Analysis of Figure 9.7	261
First Half-Cycle Operation	264
Second Half-Cycle Operation	264
First and Second Half-Cycle Operations Combined	265
First Half-Cycle Output Operation of L2	266
Second Half-cycle Output Operation of L2	267
Combining First and Second Half-Cycle Outputs	268
Filtering Output Circuits	269
Points to Remember	270
Chapter Quiz	271
<b>Chapter Ten – Transaxles, Gears, and Cooling Systems</b>	<b>273</b>
Objectives	273
Key Terms	273
Gears, Torque and Cooling Systems	274
Other Gear Reduction Topologies	277
Toyota Prius Electric Machine & Planetary Gear Operation	278
Planetary Gear Set Example: Toyota Prius Cranking Mode	283
Changing Gear Ratios and Blending Torque during Propulsion	284
Other EVT Examples	285
Motor and Power Inverter Cooling	287
Points to Remember	289
Chapter Quiz	289

	<b>Page</b>
<b>Chapter Eleven – Energy Management Hardware Systems</b>	<b>291</b>
Objectives	291
Key Terms	291
Battery Pack Fuse	292
Battery Interconnection Cables	294
Battery Pack to Power Inverter Cabling, Terminals, and Connections	297
Battery Pack Current Sensing	300
Battery Pack System Contactors (Relays)	302
Battery Pack Contactor Pre-Charge System	307
Battery Pack Thermal System	310
Battery Pack Airflow and Battery Module Temperature Sensing	317
The Battery Pack Controller	318
The Battery Pack Controller and Supplying Energy to the Drive Motor	321
What Happens When The Battery Pack Voltage Gets Low?	323
Points to Remember	324
Chapter Quiz	325
<b>Chapter Twelve – Battery Construction and Technologies</b>	<b>327</b>
Objectives	327
Key Terms	327
Battery Construction and Technologies	328
Lead Acid (PbA) Battery Families (Flooded and AGM)	328
Operating Principles of Flooded and AGM Battery Technologies	330
Basic Flooded Battery Technology Reviewed	330
Battery Discharging State	330
Battery Charging State	331
VRLA AGM Battery Technology	331
C-Rate Capacity	340
Points to Remember	341
Chapter Quiz	342
<b>Chapter Thirteen – Nickel Metal Hydride Technology</b>	<b>343</b>
Objectives	345
Key Terms	345
Nickel Metal Hydride Technology	346
Advantages and Disadvantages of NiMH Technology	347
NiMH KOH Electrolyte	347
Positive Electrode	348
Negative Electrode	348
Charge and Discharge Chemical Characteristics	348
Charge and Discharge Electrical Characteristics	350

<b>Chapter Thirteen Continued</b>	<b>Page</b>
Self Discharge	353
NiMH Operational Modes	353
Points to Remember	355
Chapter Quiz	355
<b>Chapter Fourteen – Battery Pack and Energy Management System</b>	<b>357</b>
Objectives	357
Key Terms	357
Battery Pack and Battery Pack Controllers	358
The Major Battery Pack Components	359
Battery Pack Hardware	360
Batteries	364
Series and Parallel Aiding Batteries for High Voltage	367
Connecting Batteries in Series	367
Connecting Batteries in Parallel	372
The Battery Pack Controller and Regenerative Braking	374
Points to Remember	376
Chapter Quiz	376
<b>Chapter Fifteen – Hybrid Vehicle Braking Systems</b>	<b>379</b>
Objectives	379
Key Terms	379
Hybrid Vehicle Braking Systems	380
Hybrid Braking System – Operational Background	381
Hybrid Braking System Hardware Specific Changes – Example	383
Toyota Prius Hybrid Brake Components (Fig 15.3)	383
Hybrid Braking Controls	384
Hill-Hold / Uphill Assist Control	387
Honda Civic Hybrid Creep Aid Control	388
Points to Remember	390
Chapter Quiz	391
<b>Chapter Sixteen – Hybrid Climate Control Systems</b>	<b>393</b>
Objectives	393
Key Terms	394
Hybrid Climate Control Systems	394
Electric Compressors	395
Comparing Belt Driven and Electric Compressors	396
Electric A/C Compressor Power Inverter	400
Electric Compressor Speed Control Strategy	404

<b>Chapter Sixteen Continued</b>	<b>Page</b>
Volts / Frequency Motor Speed Control	404
What is Volts / Hz Control?	404
Example of Volts/Hz Control Ratio	405
Combination Electric and Belt Drive Compressors	406
Dual Scroll Compressor Electrical Characteristics	406
Honda Accord Hybrid A/C Control Logic	409
Climate Control Systems and Engine Idle Stop Mode	410
Hybrid Cabin Heating Systems	412
Auxiliary Pump Operation during Engine Idle Off Mode	414
Speed Climate Control Notes: A/C Compressor Oil	414
How does Oil Effect Electrical Isolation?	415
Points to Remember	416
Chapter Quiz	417
<b>Chapter Seventeen – Hybrid Jump Starting and Jump Start Assist Systems</b>	<b>421</b>
Objectives	421
Key Terms	421
Hybrid Vehicle Jump Starting	422
Traditional Vehicle Jump Starting	422
Toyota Prius Jump Starting	422
Honda Hybrid Products Jump Starting	426
Ford Escape Hybrid Jump Start Assist	427
Points to Remember	430
Chapter Quiz	430
<b>Chapter Eighteen – GM Flex Power PHT</b>	<b>433</b>
Objectives	433
Key Terms	434
GM Flex Power Parallel Hybrid Truck	434
Overview	434
System Functionality Enables Increased Fuel Economy	437
Control Systems and Controllers	437
Hybrid Control Module	437
Powertrain Control Module	438
Energy Storage Control Module	439
Non-Hybrid Control Modules	439
Advanced Electrical Architecture System	439
Energy Storage Systems	440
Energy Storage Module	440
Starter-Generator Control Module System	443
Starter-Generator Control Module	443
120-Volt Auxiliary Power Outlet System	445
Power Steering System	448

<b>Chapter Eighteen Continued</b>	<b>Page</b>
Electro-Hydraulic Power Steering System	448
Vehicle Braking System (using the EHPS)	451
Driver Information Center	451
Ancillary Hybrid Systems	452
Additional System Design and Functionality	455
Vehicle Operational Modes	456
Auxiliary Power Outlet System Operating Modes	459
Normal Mode	459
Continuous Mode	460
Points to Remember	460
Chapter Quiz	461
<b>Chapter Nineteen – Belted Alternator Starter (BAS) System</b>	<b>464</b>
Objectives	464
Key Terms	465
Belted Alternator Starter (BAS) System	466
Overview	466
BAS Control System Operation	472
Additional Control System Functions	472
Hybrid Drive Cycle Overview	473
BAS Hybrid Instrumentation	475
BAS System Underhood	476
BAS Hybrid Internal Combustion Engine System	478
Hybrid Drive Belt System	479
4T45-E Hybrid Transmission	482
Motor-Generator Unit (MGU) Assembly	483
MGU Mechanical, Electrical, Mechanical, and Sensing Systems	488
Power Electronics Box (PEB) / Starter Generator Control Module (SGCM)	495
Energy Storage System	502
ESS Control System (ESS)	505
Inside the ESS	511
ESS Thermal System	515
Power Electronics Cooling and Heating Pumps	517
BAS Hybrid Braking	519
Bas Hybrid Air Conditioning Controls	521
BAS Hybrid Driving Modules	522
Drive Cycle Modes	523
Engine Cranking	523
Hybrid Auto-Start	523
Brief Electric Only Operation	524
Electric Power Assist	524
Intelligent Charging of Hybrid Battery	524
Early Fuel Cut-Off	524
Regenerative Braking	525

<b>Chapter Nineteen Continued</b>	<b>Page</b>
Brief Electric Only Operation	525
Hybrid Auto-Stop	525
Diagnostic Trouble Codes (DTCs) for Saturn Vue Hybrid FWD 2008	527
Scan Tool Output Controls – Saturn Vue Hybrid 2007	548
Scan Tool Data List – Saturn Vue Hybrid 2007	550
Summary	557
Points to Remember	558
Chapter 19 Quiz	559
 <b>Formulas and Conversions</b>	 <b>567</b>
 <b>Glossary</b>	 <b>573</b>
 <b>Answer Key to Chapter Quizzes</b>	 <b>585</b>
